

Alexander De Los Santos

Software Engineer | Full-Stack SaaS

Miramar, FL • 954-412-8651 • alexander.dlosant@gmail.com • github.com/AlexanderLos • linkedin.com/in/alexander-de-los-santos

Software engineer who ships full-stack SaaS end to end. Enterprise backend foundation in healthcare (.NET, Azure, Kubernetes). Also solo founder of a revenue-generating media intelligence platform, built and operated as a production side project. Strong background in AI tools and LLM application development.

SKILLS

Languages: TypeScript, JavaScript, C#, Python, SQL

Frontend: Next.js, React, Tailwind CSS

Backend: Node.js, .NET, Prisma, PostgreSQL (Neon), REST APIs, NextAuth.js, Stripe

Cloud & Infrastructure: Azure, AWS, Terraform, Docker, Kubernetes, Vercel

DevOps & Observability: GitHub Actions CI/CD, Hangfire, Sentry, App Insights, Azure Monitor

AI & Agentic Development: Claude Code (agentic coding, multi-agent orchestration), Claude API, OpenAI API, LLM application architecture, embeddings & semantic analysis, RAG pipelines, LLM cost & quota optimization, MCP integrations

EXPERIENCE

Mid-Level Software Engineer (Contract) | Optum | Remote

Mar 2025 – Jun 2026

- Resolved a long-standing **production failure in core claims-processing jobs** that other engineers had been unable to diagnose, root-causing three layered bugs spanning managed identities, SQL schema ownership, and Terraform database provisioning in Azure Government Cloud.
- Optimized a SQL Server data extraction pipeline, reducing runtime from **11 hours to under 4 minutes**.
- Built .NET microservices for healthcare claims processing with Hangfire for background job automation.
- Led backlog refinement and knowledge transfer sessions, scoping epics and coordinating delivery across architecture, data, and infrastructure teams.
- Authored Terraform modules for Event Hubs, Storage, and RBAC provisioning across environments.

IT Consultant (Contract) | Accenture | Remote

Aug 2024 – Mar 2025

- Built Azure Data Factory pipelines automating healthcare data workflows and integrations.
- Developed Azure Databricks notebooks and SQL stored procedures for healthcare data transformation and analysis.
- Managed CI/CD releases with Azure DevOps Pipelines, deploying data workflows across dev, test, and production environments.

Founder & Engineer | Oakrift (Whitescale Labs LLC) | Miami, FL

Sep 2025 – Present

- Solo-built and launched **Oakrift**, an AI-powered media intelligence B2B SaaS generating recurring **enterprise revenue**, with an active international sales pipeline.
- Shipped **LLM-powered intelligence features**: scheduled executive brief generation with research-augmented pipelines, statistical significance testing and embedding-based topic modeling over time-series media data, and real-time crisis alerting with tiered severity.
- Built **multi-source ingestion** processing thousands of media items weekly across **8+ social, video, news, and broadcast channels**, with per-client cost controls.
- Cut LLM and third-party API costs by **~90%** through prompt caching and quota-efficient endpoint migration.
- Implemented **production SaaS foundations** — Stripe billing, auth, RBAC team workspaces, rate limiting, per-client usage controls, and security hardening — running the platform solo end to end.

Software Engineering Fellow | General Assembly | Remote

Jul 2023 – Dec 2023

- Completed 480+ hours of full-stack training; built and shipped multiple responsive web applications (React, Node.js, Express, third-party API integrations).

EDUCATION & CREDENTIALS

B.S. Economics, Minor in Computer Science — Florida International University, Miami

2022 – 2024

Harvard Business School CORE — Pass with High Honors

2025 – 2026

Certifications: CKA — Certified Kubernetes Administrator (2025); AWS Certified Developer Associate (2024); General Assembly Certified Full Stack Developer (2023)

Languages: English (fluent), Spanish (fluent)
