Software engineer with experience in .NET, Azure, TypeScript, and React. Built claims services at Optum and data pipelines at Accenture. Founded Oakrift, a media intelligence SaaS, handling development, production support, and customer demos.

EXPERIENCE

Optum (UnitedHealth Group), via Brooksource - Software Engineer

Mar 2025 - Jun 2026

- Built **.NET microservices and Hangfire jobs** that moved claims and payment files between SFTP servers and Azure for the VA Community Care Network.
- Used PGP encryption and decryption to protect patient data in **Azure Government Cloud**.
- Cut a SQL Server pipeline from **11 hours to under 4 minutes** using indexed lookups, caching, and parallel processing, turning an overnight batch into an on-demand job.
- Fixed core claims jobs that had been failing in production for months, resolving **13 issues** across Azure authentication, SQL schema ownership, and Terraform.
- Led a **Kubernetes proof of concept** to test parallel claims submission.
- Led backlog refinement, split features into stories the team could build and test, and scoped a payments epic across **three teams**.
- Explained technical decisions to business leadership, wrote system documentation, and ran training and knowledge transfer sessions for teammates.

Accenture, via Brooksource - IT Consultant

Aug 2024 - Mar 2025

- Built healthcare data pipelines with Azure Data Factory, Databricks (PySpark), and SQL.
- Analyzed and debugged **SQL stored procedures** to resolve data issues in the enterprise data warehouse.
- Investigated Databricks dependencies in an Azure Data Factory environment with **400+ pipelines**, measured storage use, and flagged duplicate records for the team to fix.

PROJECTS

Oakrift - Media Intelligence SaaS

Sep 2025 - Present

- Built a media intelligence SaaS that turned media coverage into sourced briefs and crisis alerts, and supported **one paying enterprise client**.
- Developed ingestion from **8+ media platforms**, processing thousands of items per week with per-customer spend limits.
- Created a custom **Claude Code plugin** where agent teams implement, verify, and score changes, with hooks that block production database changes.
- Implemented Stripe billing, authentication, multi-tenant access controls, rate limits, and monitoring; handled production support and customer demos.

Technologies: TypeScript, Next.js, React, Node.js, PostgreSQL, Redis, Stripe, Claude & OpenAI APIs

SKILLS

Languages: TypeScript, JavaScript, C#, Python, SQL

Full-stack: React, Next.js, Node.js, .NET, REST APIs, PostgreSQL, SQL Server, Redis, Stripe

Cloud & DevOps: Azure, AWS, Kubernetes, Docker, Terraform, GitHub Actions, Azure DevOps, Sentry

AI: Claude & OpenAI APIs, Claude Code, Codex, MCP servers

Other: Bilingual (English/Spanish)

EDUCATION & CERTIFICATIONS

Florida International University - B.S. Economics, Minor in Computer Science

2022 - 2024

General Assembly - Full-Stack Software Engineering Certificate

Jul 2023 - Dec 2023

Completed **480+ hours** of software engineering training.

Certifications: Certified Kubernetes Administrator (CKA), 2025; AWS Certified Developer - Associate, 2024
